Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The applicant's representatives presented proposed amendments, clarifying the interpretation of the "first message-based system" and pointing out the relationship between how the meta data of the thrask is independent of the message data of the thrask. Such amendments would overcome the current rejections but further search and consideration is necessary to determine patentability. Also the applicant's representatives agreed to make amendments fixing 35 USC 101 issues. Further action will be taken by the office based on the applicant's next response.
